Software Engineer

About White Oak Technology Group

White Oak Technology Group is a technical solutions development company specializing in the design and development of custom software applications, informational and e-commerce websites, and application integrations. We provide website development and hosting, software development, business application development, as well as technical and business consulting services to clients as small as home-based businesses and as large as Fortune 100 corporations.

Our Technical Services team develops and supports the tools and applications needed to deliver the various product and services offered by our companies. We are currently seeking to fill a full time *Software Engineer* position to design, implement, and support the tools and applications that comprise our core solutions.

We offer a competitive salary and benefits package including performance bonuses, health insurance, paid time off, and a highly collaborative and flexible work environment. We are looking for energetic and intelligent individuals to join our organization and contribute to our continued success. We have a great reputation, a consistent track record of success, and the potential for tremendous growth.

Primary Job Responsibilities

- Working with our design team and clients to define website, application and data requirements.
- Developing web applications and web services using a variety of toolsets including ASP, ASP.NET, C#, HTML, JavaScript, CSS, and MS SQL Server.
- Developing T-SQL queries, views and stored procedures against MS SQL Server databases.
- Developing and updating reports using MS SQL Server Reporting Services.
- Providing excellent technical support to our internal and external clients.
- Other duties as assigned.

Job Requirements and Desired Skills

- Bachelor's Degree in Computer Science or related field or equivalent work experience required.
- Experience with ASP.NET, and C# required.
- Ability to develop complex queries including multi-table joins, aggregate functions, unions, and sub-queries required.
- Experience with MS SQL Server tools (Query Analyzer, SQL Profiler, Reporting Services, and Integration Services) desired.
- Experience with traditional web technologies such as ASP, PHP, CSS, and JavaScript desired.
- Basic knowledge of XML and HTML desired.
- Able to communicate issues and possible solutions effectively using plain language.
- Well organized with a strong attention to detail, a high sense of urgency, ability to follow through, and ability to handle multiple requests within deadlines.
- Strong analytical and problem solving skills.
- Ability to work independently while responding to requests from supervisors, co-workers, and internal customers.
- Flexible and willing to adapt to changing priorities.

Interested candidates should email a cover letter and resume to hr@whiteoaktg.com. Recent graduates should also include their GPA and relevant course/project experience.
