White Oak
TECHNOLOGY GROUP

Web Developer

About White Oak Technology Group

White Oak Technology Group is a technical solutions development company specializing in the design and development of custom software applications, informational and e-commerce websites, and application integrations. We provide website development and hosting, software development, business application development, as well as technical and business consulting services to clients as small as home-based businesses and as large as Fortune 100 corporations.

We are currently seeking to fill full and part time **Web Developer** and paid internship positions to design, implement, and support the web sites, tools and applications that comprise our core solutions. This is an excellent opportunity for students seeking part time employment and/or fulfillment of their internship requirement. Preference will be given to students looking to remain in the central Illinois area after graduation.

We offer a competitive salary and benefits package including performance bonuses, health insurance, paid time off, and a highly collaborative and flexible work environment. We are looking for energetic and intelligent individuals to join our organization and contribute to our continued success. We have a great reputation, a consistent track record of success, and the potential for tremendous growth.

Primary Job Responsibilities

- Update and maintain existing content and e-commerce websites on various platforms.
- Modify and resize images as needed using various graphics tools.
- Work with our senior web development team to create new websites, web applications, and web services using a variety of toolsets.
- Work with our design team and clients to define website, web application and data requirements.
- Provide excellent technical support to our internal and external clients.
- Other duties as assigned.

Required Skills

- Experience with traditional web technologies such as HTML, PHP, CSS, and JavaScript required.
- Experience writing basic queries against relational databases such as MS SQL and MySQL required.
- Able to communicate issues and possible solutions effectively using plain language.
- Well organized with a strong attention to detail, a high sense of urgency, ability to follow through, and ability to handle multiple requests within deadlines.
- Strong analytical and problem solving skills.
- Ability to work independently while responding to requests from supervisors, co-workers, and internal customers.
- Flexible and willing to adapt to changing priorities.

Additional Skills Desired but Not Required

- Knowledge of basic TCP/IP addressing and DNS principals desired.
- Familiarity with Joomla!, PrestaShop, SharePoint, or other content management systems desired.
- Familiarity with CentOS, cPanel, Apache, Tomcat, and GitHub/Bitbucket would be a plus.
- Experience with web application development languages such ASP.NET, C#, or Java desired.
- Experience developing advanced T-SQL queries, views and stored procedures against MS SQL Server databases desired.
- Experience with MS SQL Server Reporting Services desired.

Interested candidates should email a cover letter and resume to hr@whiteoaktg.com. Students and recent graduates should also include their GPA and relevant course/project experience.
